

UPBOTS

The All-in-one Trading Interface For The Modern Trader

Official Partners

■ What is UpBots?

The first blockchain-based all-in-one trading ecosystem designed to simplify digital asset management and empower anybody, regardless of skill or experience.

Trade all your assets in one place using CEX, DEX or DeFi Solutions

Trade on autopilot thanks to automatic algorithms and copy-trading

Access a complete marketplace with courses, bots & signals

Control all your
assets on Centralized
and Decentralized
exchanges from one
single place

■ Trader Pain Points

Newbie Traders have little **knowledge in trading**

DeFi staking, borrowing and lending capital is complex & confusing

These traders suffer frequent and **significant losses**

Lack of tools to create multi-parameter bots easily

Difficult to distinguish **quality signal & service providers** from scams

Difficulty in finding or creating **quality algos**

Trading requires many different tools, **accounts on different services**, browsers and tabs

Difficulty to manage **Forex and Cryptos** at the same time

Trading multiple **CEX and DEX**, Forex and Commodities simultaneously is difficult and process prohibitive for most

Always need to pay before making a profit

The UpBots Platform

The UpBots platform makes trading simple for new recruits but offers powerful advanced trading tools for experienced traders

Ability to trade on both DEXs and CEXs simultaneously

Stake, lend and borrow assets from a multitude of DeFi protocols

Blockchain-based web and mobile trading platform

Bot Creator where you can develop, use & rent your own trading algo

Complete set of powerful, advanced trading tools in a simple, beautiful interface

Marketplace for the best signals providers in the space

Training resources built into the platform to help traders learn and grow at their own pace

Wide range of automatic trading bots ready to deploy

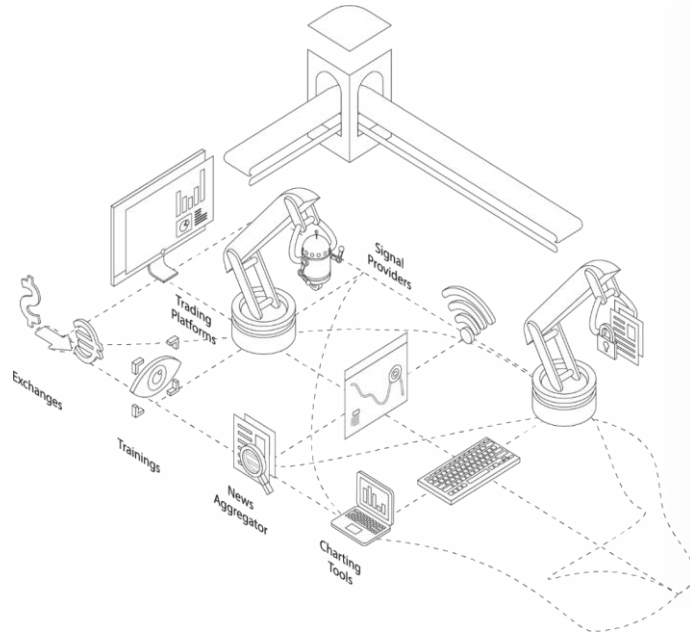

Social copy-trading tool for the newbie and busy traders

Extensive decision support tools to create an unmatched trading experience

Without UpBots

With UpBots

UpBots re-wires the entire trading process alongside associated activities

Strategic Advisor

UpBots token economy has been designed to be velocity controlled and highly connected to the business success

Token Economy

Locking of the tokens

To lower entry barriers without decreasing the UBX token value, FIAT payment will also be allowed and will be automatically converted into UBX equivalent that will be locked during the time of the subscription

HODL program

A loyalty program will reward users that keep their UBX for a certain amount of time. This will slow down the token velocity and incentive for long term holding

Maximum limit of tokens

There is a maximum limit of tokens, meaning that we will not create more tokens

Market maker

To ensure the liquidity of the tokens we partnered with a market maker

Token usage

UBX tokens will have a key role in the dashboard and have multiple usage such as payment of the subscription, trainings, payment of the profit fees...

Burning program

Q1 2021 — **15%**

Q1 2022 — **10%**

Q1 2023 — **5%**

Q1 2024 — **2%**

% Of the net income, that will be used to burn tokens

HOLD Program

The UpBots Hold program will offer a range of benefits to UpBots platform users. The holding program will be available as soon as the interface is launched.
